SNEHAL JAGTAP

AI Engineer, ML Engineer, Generative AI Engineer
Pune, Maharashtra, India | +91 7262068148 | sapatil2115@gmail.com
LinkedIn | GitHub| Portfolio

Professional Summary

AI/ML Engineer specializing in Generative AI, with hands-on experience building Retrieval-Augmented Generation (RAG) pipelines, Large Language Model (LLM) applications, AI agents, NLP, and semantic search using Python, LangChain, ChromaDB, FastAPI, and REST APIs. Built and Dockerized two end-to-end AI projects. AWS Certified Cloud Practitioner pursuing a PG Diploma in Data Science & Artificial Intelligence at COEP Technological University, Pune.

Technical Skills

Programming Languages: Python, SQL, Java, PHP, JavaScript, Object-Oriented Programming (OOP)
Generative AI & LLM: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, Semantic Search, Vector Search, Vector Embeddings, Natural Language Processing (NLP), Conversational AI, Speech-to-Text, Text-to-Speech
Machine Learning: Machine Learning, Scikit-learn, Pandas, NumPy, Data Preprocessing, Data Pipelines, Feature Extraction
Frameworks & Databases: LangChain, FastAPI, Laravel, REST APIs, WebSockets, MVC Architecture, ChromaDB (Vector Database), MySQL, MongoDB
Cloud, DevOps & Tools: Docker (Containerization), AWS, GCP, Git, GitHub, Postman, VS Code

Projects

RAG-Based Real-Time Voice AI Agent
Tech stack: Python, FastAPI, WebSockets, LangChain, ChromaDB, LLM, Docker
GitHub Link

- Built a real-time AI voice assistant using FastAPI, WebSockets, Speech-to-Text, and Text-to-Speech APIs for interactive voice conversations.
- Developed an end-to-end RAG pipeline with LangChain, embeddings, and ChromaDB, integrating LLMs with semantic search for accurate, context-aware responses.
- Optimized AI workflow processing for faster response generation and containerized the application with Docker for a scalable, deployment-ready architecture.

AI Anime Recommendation System
Tech stack: Python, ChromaDB, Vector Embeddings, Semantic Search, REST API, Docker
GitHub Link

- Built an embedding-based recommendation system using semantic search, with an end-to-end pipeline for data cleaning, preprocessing, feature extraction, and embedding generation.
- Implemented vector similarity search in ChromaDB to retrieve relevant recommendations based on user preferences and content similarity.
- Developed REST APIs and deployed the application with Docker for scalable execution.

Work Experience

ERP Developer Intern, Zetavomi Technology, Pune, India Dec 2024 to Jul 2025

- Developed and maintained ERP modules (CRM, HRM) using PHP, Laravel, SQL, HTML, CSS, and JavaScript, following MVC architecture and OOP principles.
- Designed and optimized SQL queries to improve database performance and developed REST APIs for communication between modules.
- Used Git for version control, debugging, and feature implementation in a collaborative team.

Education

PG Diploma in Data Science & Artificial Intelligence 2025 to Present
COEP Technological University, Pune
Bachelor of Engineering (Electronics & Telecommunication) 2020 to 2023
Savitribai Phule Pune University | CGPA: 8.30
Diploma in Computer Engineering
Maharashtra State Board of Technical Education (MSBTE)

Certifications

AWS Certified Cloud Practitioner
