AI Engineer — Machine Learning Engineer — Generative AI Engineer

Pune, Maharashtra

Summary

AI/ML Engineer with hands-on experience in Machine Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Semantic Search, and FastAPI. Skilled in Python, LangChain, ChromaDB, SQL, Docker, AWS, and cloud technologies. Passionate about building scalable AI applications using Generative AI.

Technical Skills

Programming Languages: Python, Java, SQL

Machine Learning & AI: Machine Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, Semantic Search

Frameworks & Libraries: LangChain, FastAPI, Pandas, NumPy, Scikit-learn

Vector Databases: ChromaDB

Databases: MySQL, MongoDB

Cloud & DevOps: Docker, AWS, GCP

Developer Tools: Git, GitHub, VS Code, Postman

Projects

AI Anime Recommendation System

GitHub

- Built an AI-based anime recommendation system to provide personalized recommendations using semantic search and vector embeddings.
- Developed an end-to-end data processing pipeline including data cleaning, preprocessing, feature extraction, and embedding generation.
- Implemented vector similarity search using ChromaDB to retrieve relevant anime recommendations based on user preferences and content similarity.
- Integrated machine learning techniques and embedding-based retrieval to improve recommendation quality and deliver context-aware results.
- Developed REST APIs and deployed the application using Docker for scalable and efficient execution.

Real-Time Voice AI Agent with RAG

GitHub

- Built a real-time AI voice assistant using FastAPI, WebSockets, Speech-to-Text, and Text-to-Speech APIs for interactive voice conversations.
- Developed an end-to-end Retrieval-Augmented Generation (RAG) pipeline using LangChain, embeddings, and ChromaDB for efficient context retrieval.
- Integrated Large Language Models (LLMs) with semantic search to generate accurate and context-aware conversational responses.
- Implemented vector-based document retrieval and optimized AI workflow processing for faster response generation.
- Containerized the application using Docker and created a scalable deployment-ready architecture.

Work Experience

Zetavomi Technology

Pune, India

ERP Developer Intern

Dec 2024 – Jul 2025

- Developed and maintained ERP modules including CRM and HRM using PHP, Laravel, SQL, HTML, CSS, and JavaScript.
- Designed and optimized SQL queries to improve database performance and application efficiency.
- Developed and integrated REST APIs for seamless communication between application modules.
- Collaborated with the development team using Git for version control, debugging, and feature implementation.
- Followed MVC architecture and Object-Oriented Programming (OOP) principles during application development.

Education

PG Diploma in Data Science & Artificial Intelligence

2025 – Present

COEP Technological University, Pune

Bachelor of Engineering (Electronics & Telecommunication)

2020 – 2023

Savitribai Phule Pune University

CGPA: 8.30

Diploma in Computer Engineering

2017 – 2020

Maharashtra State Board of Technical Education (MSBTE)

Certifications

- AWS Certified Cloud Practitioner
